HOW TO READ THIS REPORT

The Opportunity Score (0–100) is calculated from removal risk, posting activity, Google visibility, and how often this keyword comes up in the subreddit — higher means a better opportunity.

POST means it's safe to post now. **WARMUPFIRST** means build some karma and post history before posting. **AVOID** means high risk — don't post without significant prep.

This report reflects a genuine effort to identify where your buyers already talk about skincare, after careful analysis of removal risk, traction, and community moderation.
